Regex Continued

Recall: GREP

- We used to search for lines containing certain string
- grep: global regular expression print
- Can search for patterns, not just specific strings by expressing regex
- Add -E to search for ERE pattern

Misc Notes (Regex in general)

- Matches longest possible string
- can also use character classes (like with tr)
- examples
  - [[:alpha:]]
  - [[:alnum:]]
  - [abc]
  - [^a-z] everything except a through z
