

Transferring Files

SCP

- ssh allowed us to securely access a shell on remote devices
- What about moving files?
 - scp
- Command Format:
 - `scp [[user@]src_host:]srcpath [[user@]dest_host:]destpath`
- Example: Transfer file to remote machine
 - `scp pathtofile username@hostname:~/some/remote/directory`
 - moving the other way?
 - swap the order

RSYNC

- different alg for transfer
 - checks for changes and differences only transfers differences
- Command format (like scp):
 - `rsync [[user@src_host:] srcpath [[user@dest_host:]destpath`
- Example
 - `rsync filename username@hostname:~`
- Many options: recursive, delete, ...
