C - Loops

Simple Arrays

- arrays have a type
- for now, we'll only have statically sized arrays
- examples

```
int arr[10];
int arr[3] = {2, 4, 6};
char arr[5];
char arrt[] = "hello";
```

Control Structures – For Loop

- Example

```
for (i=0; i<10; i++){
    \\ do something cool here
}
```

- Depending on version of C, may be able to create loop variable in initialization

Control Structures – While Loop

```
while (expression) {
    statement;
}
```
